

QuestKids Academy

QuestKids specializes in helping children with autism, pervasive development disorder, and other learning and behavior concerns with individualized one-on-one programs using Applied Behavior Analysis (ABA). To allow these children access to a much-needed classroom setting in incremental steps and better transition into a mainstream class, we are excited to announce the opening of QuestKids Academy in fall 2009!

As a natural extension of the QuestKids program, QuestKids Academy will deliver *quality education* using the *ABLLS and VB-MAPP* combined with a *state-approved curriculum*, while also providing *individualized 1:1 and group ABA therapy*. QuestKids Academy will be one of the few accredited McKay providers in Central Florida with a *Board Certified Behavior Analyst and Education Specialist, occupational therapy, speech therapy and playground facilities* **all** under one roof.

Centrally located at **514 E. Colonial Drive**, QuestKids Academy will offer four classrooms with two-way observation windows, allowing parents to discreetly view their child's development. An open-door policy coupled with weekly parent-teacher meetings were also designed to review educational goals and progress in the program.

For more information about QuestKids Academy, please contact *Ansley Hodges, BCBA* at **407.218.4346**.
